

Rock Data Chart

| # | Name | Texture (see texture chart) | How formed [igneous (extrusive), sedimentary (organic), etc..] | Grain size (instructions below*) |
|---|------|--------------------------------|--|-------------------------------------|
| 1 | | | | |
| 2 | | | | |
| 3 | | | | |
| 4 | | | | |
| 5 | | | | |
| 6 | | | | |
| 7 | | | | |
| 8 | | | | |

*Grain size: If grains are too small to see (or feel), write “micro”. If they are larger than two millimeters (mm: the small divisions on the scale), measure the largest grain and write “up to ___ mm”. Otherwise, write “< 2 mm”
